

Assembly of Allen Parking Rack:

Tools needed: 2 - Adjustable wrenches.

Note: Do not tighten any of the nuts until unit is completely assembled

1. Install plastic end caps on all tube ends before assembly. **Note:** Second support pole and nuts are for Double models only.
2. Align Center Support's top and bottom holes (A) with "A" holes on End Supports. Insert bolts and install washers and nuts.
3. Align "B" holes on Support Poles. Insert bolts and install washers and nuts.
4. Tighten all nuts firmly.
